

THE YARD

Grade R

Date: 8 July

School work

Theme: Coronavirus

English

Poem:

Hands washed; noses squashed:

Pippa and Pol are very sad,
This Corona is so bad.
The president said:
"Wear your mask and stay at home!"
But it feels so alone.

Pol hates wearing his mask,
Breathing has become a huge task.
Pippa dislikes her mask too,
There are no holes to breathe through.

We want to go back to school, please!
Can you get rid of this disease?
Soon the pandemic will pass,
And we will be back in class.

-Monique du Plooy-

Mathematics

Use a bucket of water and different objects to measure out the water. Try to determine how many cups of water is in the bucket, or how many spoons of water fits in a container.

Life Skills

General knowledge:

Discuss the corona virus with your child. Ask your child about their masks. Tell them how to properly put on and remove a mask. Ask them why it is important to wear masks.

Gross motor skills:

Use an empty container and collect 10 stones. Let your child stand 5 steps away from the container and see how many stones they can throw into the container. Ask them how many they threw in the container, and how many fell outside.

Fine motor skills:

Use a newspaper or magazine to cut out pictures of activities that your child likes to do. Use the template provided to sort the activities into activities done during the day and activities done at night. For example: We play with the ball during the day and we eat supper at night.

General:

- Sort magazine pictures into day and night.
- Count and graph

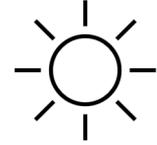

Kind Regards,

Grade R Educators

Find pictures of activities that people do. Sort them into things you can do in the day and things to do at night.
For example: I eat supper at night. I play with my toys during the day.
